

## Use Case Diagram and Use Case Full Description for Queensway Website

|                      |   |
|----------------------|---|
| Use Case ID          | QW_UC_1   |
| Use Case Name        | Create Account  |
| Description          | This use case enables customers to register a new account on the Queensway Website to gain access to its features.  |
| Primary Actor        | Customer  |
| Secondary Actor      | None  |
| Include Use Case     | None  |
| Preconditions        | <ul style="list-style-type: none"> <li>The user must not already have an existing account.</li> <li>The system is accessible and online.</li> </ul>   |
| Postconditions       | <ul style="list-style-type: none"> <li><b>Success:</b> The user is successfully registered, and a confirmation email is sent.</li> <li><b>Failure:</b> The user is notified of the failure reason and prompted to retry.</li> </ul>   |
| Triggers             | <ul style="list-style-type: none"> <li>The user wants to create an account on the Queensway Website to access its features.</li> </ul>  |
| Main Flow            | <ol style="list-style-type: none"> <li>User navigates to the registration page.</li> <li>System prompts the user to enter details such as: <ol style="list-style-type: none"> <li>Username</li> <li>Name</li> <li>Age</li> <li>Address</li> <li>Email Address</li> <li>Contact Number</li> <li>Password (meeting security requirements)</li> </ol> </li> <li>User submits the registration form.</li> <li>System validates the information.</li> <li>System sends a confirmation email.</li> <li>User clicks the confirmation link in the email.</li> <li>The system activates the account and displays a success message.</li> </ol>   |
| Alternate Flows      | <ol style="list-style-type: none"> <li>Invalid Input: <ol style="list-style-type: none"> <li>If the user provides invalid or incomplete information, the system notifies the user.</li> <li>The user is prompted to correct the input.</li> </ol> </li> <li>Duplicate Username: <ol style="list-style-type: none"> <li>System notifies the user that the Username is already taken.</li> <li>User is prompted to use a different Username.</li> </ol> </li> <li>Duplicate Email Address: <ol style="list-style-type: none"> <li>System notifies the user that the email is already registered.</li> <li>User is prompted to use a different email.</li> </ol> </li> <li>Password Requirements Not Met: <ol style="list-style-type: none"> <li>System notifies the user that the password did not meet the security requirements.</li> <li>User is prompted to use a different password.</li> </ol> </li> <li>Email Not Received <ol style="list-style-type: none"> <li>User requests the system to resend the confirmation link.</li> </ol> </li> </ol> |
| Special Requirements | <ul style="list-style-type: none"> <li>Email verification links should expire after 5 minutes.</li> </ul>   |
| Assumptions          | <ul style="list-style-type: none"> <li>Users have access to a valid email address.</li> </ul>   |

|                      |  |
|----------------------|--|
| Use Case ID          | QW_UC_2  |
| Use Case Name        | Update Account   |
| Description          | This use case allows users to update their account details, such as personal information, email, or password.  |
| Primary Actor        | Customer   |
| Secondary Actor      | None   |
| Include Use Case     | None   |
| Preconditions        | <ul style="list-style-type: none"> <li>The user must already have an existing account.</li> <li>The user must be logged in to the system.</li> <li>The system is accessible and online.</li> </ul>   |
| Postconditions       | <ul style="list-style-type: none"> <li><b>Success:</b> The account details are updated, and the user receives a notification confirming the changes.</li> <li><b>Failure:</b> The user is notified of the failure reason (e.g., invalid input, session timeout) and prompted to retry</li> </ul>   |
| Triggers             | <ul style="list-style-type: none"> <li>The user wants to modify their account information.</li> </ul>  |
| Main Flow            | <ol style="list-style-type: none"> <li>User navigates to the account settings page.</li> <li>System displays the current account details.</li> <li>User edits the desired fields (e.g., username, name, age, address, contact number, email address, password).</li> <li>User submits the updated details.</li> <li>System validates the input and applies the changes.</li> <li>User receives a confirmation notification about the update.</li> </ol>  |
| Alternate Flows      | <p>4a. Invalid Input:</p> <ol style="list-style-type: none"> <li>If the user provides invalid or incomplete information, the system notifies the user.</li> <li>The user is prompted to correct the input.</li> </ol> <p>4b. Duplicate Username:</p> <ol style="list-style-type: none"> <li>System notifies the user that the Username is already taken.</li> <li>User is prompted to use a different Username.</li> </ol> <p>4c. Duplicate Email Address:</p> <ol style="list-style-type: none"> <li>System notifies the user that the email is already registered.</li> <li>User is prompted to use a different email.</li> </ol> <p>4d. Password Requirements Not Met:</p> <ol style="list-style-type: none"> <li>System notifies the user that the password did not meet the security requirements.</li> <li>User is prompted to use a different password.</li> </ol> <p>5a. Session Timeout:</p> <ol style="list-style-type: none"> <li>If the user's session expires during the update process, the system redirects the user to the login page.</li> <li>User logs in again and restarts the update process.</li> </ol> |
| Special Requirements | <ul style="list-style-type: none"> <li>Sensitive information (e.g., passwords) must be encrypted during transmission and storage.</li> </ul>   |
| Assumptions          | <ul style="list-style-type: none"> <li>Users know their current account credentials for sensitive updates like password changes.</li> </ul>  |

|                      |   |
|----------------------|---|
| Use Case ID          | QW_UC_3   |
| Use Case Name        | Log In  |
| Description          | This use case allows users to log in to the Queensway Website to access their account and its functionalities.  |
| Primary Actor        | Customer  |
| Secondary Actor      | None  |
| Include Use Case     | None  |
| Preconditions        | <ul style="list-style-type: none"> <li>The user must already have an existing account.</li> <li>The system is accessible and online.</li> </ul>   |
| Postconditions       | <ul style="list-style-type: none"> <li><b>Success:</b> The user is authenticated and logged into their account.</li> <li><b>Failure:</b> The user is notified of the failure reason (e.g., incorrect credentials, unverified email) and prompted to try again.</li> </ul>   |
| Triggers             | <ul style="list-style-type: none"> <li>The user wants to access their account to access the features of the Queensway Website.</li> </ul>   |
| Main Flow            | <ol style="list-style-type: none"> <li>User navigates to the login page.</li> <li>System prompts the user to enter their credentials: <ol style="list-style-type: none"> <li>Username or Email Address</li> <li>Password</li> </ol> </li> <li>User submits the login form.</li> <li>System validates the credentials.</li> <li>The system logs the user in.</li> <li>User is redirected to their dashboard with personalized account access.</li> </ol>   |
| Alternate Flows      | <ol style="list-style-type: none"> <li>Invalid Input: <ol style="list-style-type: none"> <li>If the user provides invalid credentials (e.g., blank fields, username does not exist, incorrect password), the system notifies the user.</li> <li>The user is prompted to re-enter their credentials.</li> </ol> </li> <li>Unverified Email: <ol style="list-style-type: none"> <li>If the user's email address is not verified, the system displays a message and provides an option to resend the verification link.</li> <li>The user verifies their email and repeats the login process.</li> </ol> </li> </ol> |
| Special Requirements | <ul style="list-style-type: none"> <li>Passwords must be encrypted and stored securely in the system.</li> </ul>  |
| Assumptions          | <ul style="list-style-type: none"> <li>Users have access to valid login credentials and a functional email account.</li> </ul>  |

|               |                 |
|---------------|-----------------|
| Use Case ID   | QW_UC_3A        |
| Use Case Name | Forgot Password |

|                      |   |
|----------------------|---|
| Description          | This use case allows users to reset their password if they cannot log in to their account.  |
| Primary Actor        | Customer  |
| Secondary Actor      | None  |
| Include Use Case     | None  |
| Preconditions        | <ul style="list-style-type: none"> <li>The user must already have an existing account.</li> <li>The system is accessible and online.</li> </ul>   |
| Postconditions       | <ul style="list-style-type: none"> <li><b>Success:</b> The user receives a password reset email or OTP using contact number, verifies their identity, and resets the password successfully</li> <li><b>Failure:</b> The user is notified of any issues (e.g., unregistered email) and prompted to try again.</li> </ul>   |
| Triggers             | <ul style="list-style-type: none"> <li>User clicks the "Forgot Password" link on the login page.</li> </ul>   |
| Main Flow            | <ol style="list-style-type: none"> <li>User navigates to the login page and clicks on the "Forgot Password" link.</li> <li>System prompts the user to enter their registered email address.</li> <li>User provides their email address and submits the request.</li> <li>System validates the email address: <ol style="list-style-type: none"> <li>Ensures it is registered in the system.</li> <li>Verifies the email format is correct.</li> </ol> </li> <li>If the email is valid, the system sends a password reset email containing a secure link.</li> <li>User receives the email and clicks on the password reset link.</li> <li>System redirects the user to a password reset page.</li> <li>User enters a new password that meets security requirements and confirms it.</li> <li>System updates the password and notifies the user of a successful reset.</li> </ol>            |
| Alternate Flows      | <ol style="list-style-type: none"> <li><b>Email Address Not Registered:</b> <ol style="list-style-type: none"> <li>If the email is not found in the system, the system notifies the user.</li> <li>User is prompted to try a different email or contact support for assistance.</li> </ol> </li> <li><b>Email Not Received:</b> <ol style="list-style-type: none"> <li>If the user does not receive the password reset email, the system provides an option to resend it.</li> <li>User clicks the resend option and proceeds with the password reset process.</li> </ol> </li> <li><b>Weak Password Entered:</b> <ol style="list-style-type: none"> <li>If the user enters a password that does not meet security requirements (e.g., too short, missing special characters), the system notifies the user.</li> <li>User is prompted to enter a stronger password.</li> </ol> </li> </ol> |
| Special Requirements | <ul style="list-style-type: none"> <li>The system must ensure the password reset link is secure and expires after 5 minutes.</li> <li>Passwords must adhere to strong security requirements (e.g., minimum length, special characters).</li> </ul>  |
| Assumptions          | <ul style="list-style-type: none"> <li>Users have access to the email address associated with their account.</li> <li>The system can reliably send emails without delays.</li> </ul>  |

|                      |   |
|----------------------|---|
| Use Case ID          | QW_UC_4   |
| Use Case Name        | Send Inquiries  |
| Description          | This use case allows users to send inquiries to Queensway Staff about products, orders, or other concerns.  |
| Primary Actor        | Customer  |
| Secondary Actor      | Queensway Staff<br>Queensway Manager  |
| Include Use Case     | None  |
| Preconditions        | <ul style="list-style-type: none"> <li>The user must already have an existing account.</li> <li>The user must be logged in to the system.</li> <li>The system is accessible and online.</li> </ul>  |
| Postconditions       | <ul style="list-style-type: none"> <li><b>Success:</b> The inquiry is submitted, and the staff is notified.</li> <li><b>Failure:</b> The user is notified of the failure reason and prompted to retry.</li> </ul>   |
| Triggers             | <ul style="list-style-type: none"> <li>The user has a question or concern and wishes to contact Queensway Staff.</li> </ul>   |
| Main Flow            | <ol style="list-style-type: none"> <li>User navigates to the inquiries page.</li> <li>System displays an inquiry form.</li> <li>User fills out the form with relevant details, such as: <ol style="list-style-type: none"> <li>Subject</li> <li>Message content</li> <li>Contact details</li> </ol> </li> <li>User submits the form.</li> <li>System confirms the inquiry submission and notifies the Queensway Staff.</li> <li>Systems sends an email to the Queensway Manager.</li> </ol> |
| Alternate Flows      | 4a. Missing Required Fields: <ol style="list-style-type: none"> <li>If the user leaves required fields blank, the system notifies the user.</li> <li>User completes the form and resubmits.</li> </ol>  |
| Special Requirements | <ul style="list-style-type: none"> <li>The system should support file attachments for inquiries (e.g., screenshots).</li> </ul>   |
| Assumptions          | <ul style="list-style-type: none"> <li>Queensway Staff regularly checks inquiries and responds promptly.</li> <li>Queensway Manager checks emails for inquiries.</li> </ul>   |
